reductions: reading-group dependencies
Rows depend on columns. U = uses; A = assumes; UA = both.
Numbers match PDF contents; E = external module.
Blank: no cross-group edge. Grey: internal or external detail omitted.

Group / prerequisite column	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	E1	E2	E3	E4
1 Squashing relations and their statistics	-																											
2 Protocols, security criteria and exact operational reductions	U	-	U				U				U		A															
3 Output-state equality and security transfer	U	U	-	U						U			A												U			A
4 Operations on squashing relations	U		U	-					U				A															
5 Branching and flag targets	U		U	U	-																							
6 Event-level device facts, attack sets and the licence	U		U	U		-							A												U			
7 Typed links and reduction chains	U		U	U		U	-																					U
8 The source-side reduction and the two-sided theorem	U	U	U			U	U	-																				UA
9 The number model and exact decisions									-																U			
10 Reduction instances	U			U	U	U	U		U	-	U																	
11 Exact emission	U		U	U		U	U		U	U	-		A												UA			
12 The reference companion	U		U	U		U	U		U	U	U	-													UA	U		
13 Assumptions		U											-												U			
14 Requirements: channel witnesses, post-processing and relations	U	U	U	U	U									-														
15 Requirements: chains, constraint slots and the licence						U	U				U				-													
16 Requirements: constraint entries	U		U			U				U	U					-												
17 Requirements: exact admission and emission									U	U	U	U					-								UA			
18 Requirements: the assumption ledger																		-								U		
19 Flag-state and weight-preserving squashers: Flag-state targets and their chain	U		U	U	U								A						-	U								
20 Flag-state and weight-preserving squashers: The weight route				U					U	U	U		A						U	-	U				U	U	U	
21 Flag-state and weight-preserving squashers: The flat instance and its emission	U		U	U		U			U	U	U	U	A						U	U	-					U	U	
22 Flag-state and weight-preserving squashers: Requirements										U									U	U	U	-						
23 Domination links: The domination link and its noise channel	U		U		U		U			U													-		U			
24 Domination links: Domination in a reduction chain	U		U			U	U			U													U	-	U
